Top Skills

Data Science & Analysis: Pandas, NumPy, SQL, Data Visualization

Machine Learning: Regression, Classification, Clustering, Deep Learning Basics

Python (Programming Language)

Languages

Hindi (Native or Bilingual)

English (Limited Working)

Magahi (Native or Bilingual)

Certifications

Innovation

Certificate of Participation in Codemet

Certificate of Participation in Trilytics'24: Analytics Case Competition

Ravi Soni

Product Engineer Intern @PhysicsWallah | AI & Automation Specialist | Python • SQL • LLMs | Data Science & AI @IIT Guwahati | Building Scalable AI Solutions
Bengaluru, Karnataka, India

Summary

I am a Data Science & AI undergraduate at IIT Guwahati, currently driving impact as a Product Engineer Intern at Physics Wallah (PW). I specialize in bridging the gap between raw data and business intelligence through high-impact automation and AI systems.

At PW, I have focused on:

Workflow Automation: Developed custom Python scripts and Telegram bots to automate marketing (PWIOI) and streamline student data mapping (JEE/10th/12th scores).

Business Intelligence: Built end-to-end Sales and Admission dashboards using Looker Studio, providing real-time funnel visibility for stakeholders like Alakh Sir and the leadership team.

Technical Engineering: Developed a specialized video extraction tool for candidate assessment (Mettle), optimizing the hiring pipeline.

My Technical Arsenal:

AI/ML: Built a Transformer architecture from scratch (PyTorch), RAG-based systems (FAISS), and LLM-powered evaluation pipelines (FastAPI).

Data Engineering: Expert in SQL (CTEs, Window Functions), Python automation, and Dockerized deployments.

I thrive on solving "unstructured" problems—whether it's building a real-time token streaming chatbot or a demand-based pricing signal platform. Currently looking to transition into core Tech/AI roles where I can build production-grade AI products.

Connect with me to discuss AI, Automation, or the future of EdTech!

Experience

PW (PhysicsWallah)

Product Engineer

April 2026 - Present (3 months)

Noida, Uttar Pradesh, India

- 1.) AI & Automation: Developed a Video Downloader Automation tool using Streamlit to extract and organize candidate videos from Mettle PDFs, improving recruitment efficiency.
- 2.) Business Dashboards: Designed and deployed Admission & Sales Dashboards on Looker Studio for the PWIOI team, featuring complex data sync, funnel tracking, and automated reporting.
- 3.) Community Automation: Built a custom Telegram Bot for PWIOI channel promotions, handling automated notifications and user engagement links.
- 4.) Data Integrity: Created Python-based mapping scripts to automate the synchronization of student academic records (10th, 12th, and competitive scores) across multiple sheets.
